## Part A

//Note, all screenshots are from my phone where the testing took place. It was done on an iPhone hence why the home bar is at the bottom.

## Part B

### AppBar

#### Adjustments Made:

- Changed background colour to Red
- Uncentered the title
- Added text to the bottom of the app bar
- Set the height of the app bar to 50px

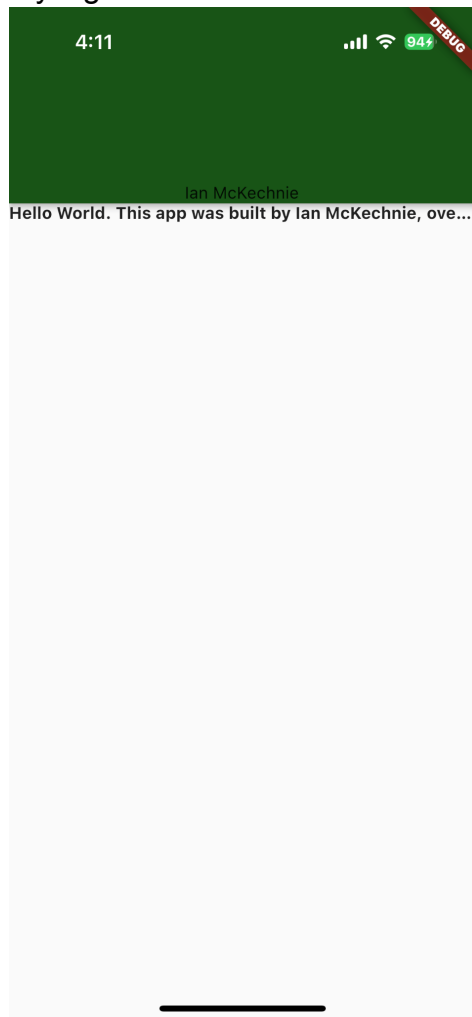

### Ugly AppBar

#### Adjustments Made

- Removed the title
- Made the colour hot pink
- Set the height of the AppBar to be 1000

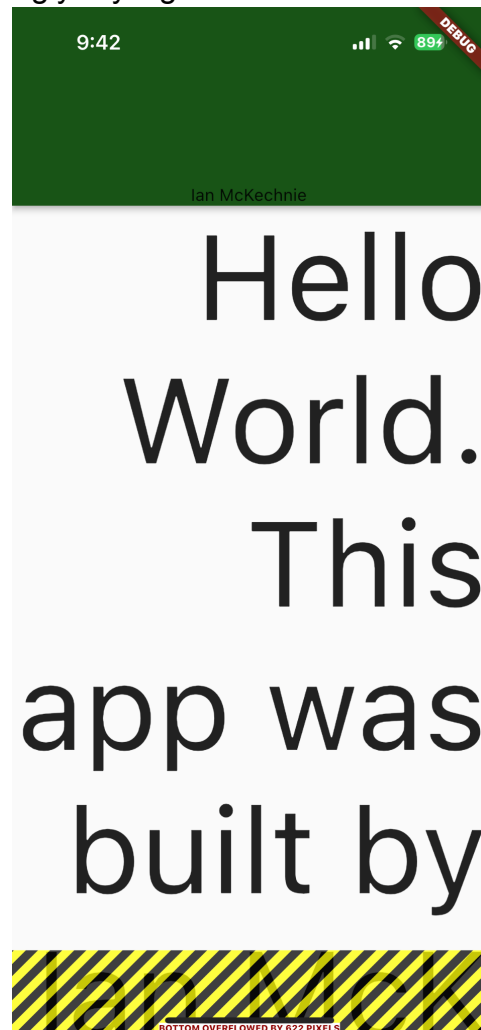

### Styling Text

#### Updates Made:

- Text alignment was set to justify
- Overflow is set to ellipsis (so it just shows an ellipsis at the end of the line overflowing)
- Made the entire text bold

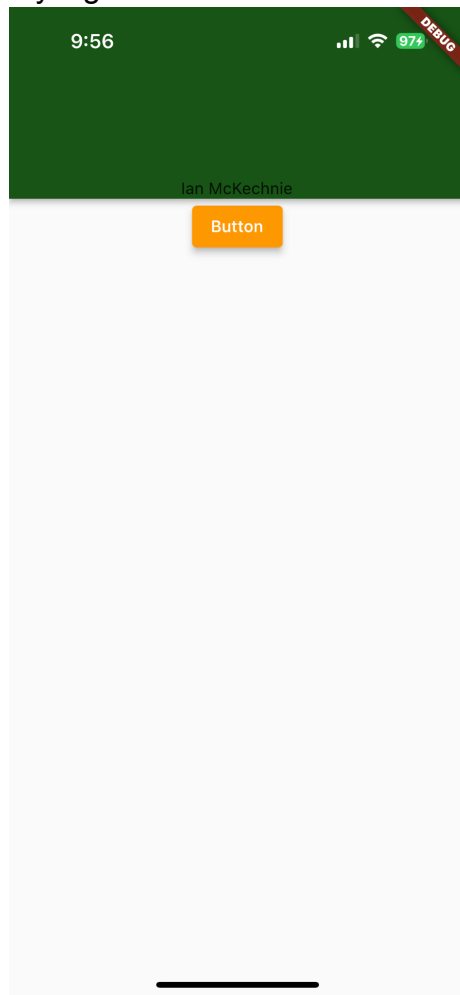

### Ugly Styling Text

#### Updates Made:

- Increased font size to 100
- Set the overflow to fade
- Set the text align to right

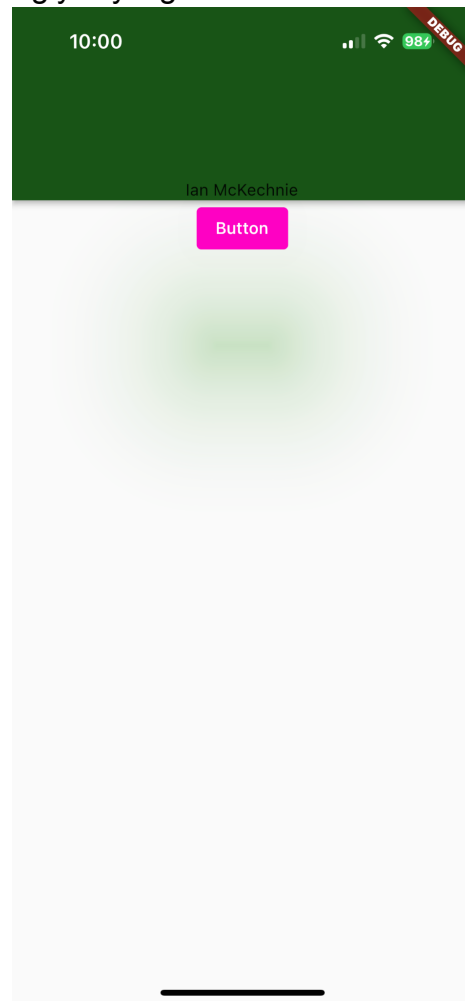

## Styling a Button

### Updates Made

- Set the background colour of the button to orange
- Set the elevation of the shadow to 5
- Set 'enabled' to false (could not be clicked by the user)

## Ugly Styling a Button

### Changes made

- Set the button background colour to hot pink
- Set the button shadow to lime green
- Set the button shadow height to 100
